

# MEGABLASTERS

## ESCAPE FROM CASTLE IN THE CLOUDS

### ENGLISH

#### LE JEU

At the end of their first adventure, Bart and Bob defeated the sorcerer Cobron and rescued the twins with magical powers so that they could bring peace to the kingdom... At least that's what they thought! Now they are awakened by a mysterious entity that reveals to them that Cobron has cast a spell that

has put them to sleep for twenty years and that none of this has taken place.

The sorcerer finally managed to invoke the powers of the serpent god and ravaged the kingdom to enslave its inhabitants. Only Castle In The Clouds has so far been spared but the Cobron's forces will soon be at its doors. Our two heroes will have to repel their assailants to allow the inhabitants of the castle to escape. Armed with their bombs, they will have to be skilful to defeat their enemies.

#### HOW TO PLAY

On the main screen, press the FIRE 1 button on your controller or the space bar to display the options menu. Press the key corresponding to the highlighted letter of the desired option.

In 1 player mode, your objective is to destroy all monsters in each level of the game. You control Bart using the keyboard keys (Q/A/O/P) or your favourite controller. To destroy your enemies you use bombs that, once laid, explode after a few seconds. To lay a bomb, press the space bar or the FIRE 1 button.

In 2 player mode, player 1 controls Bart (blue) while player 2 controls Bob (red). The goal remains the same and players can cooperate to defeat Cobron's forces. But regarding the bonuses, it is each for yourself! Depending on the configuration chosen, one player uses the joystick while the second player uses the keyboard keys.

#### WHILE PLAYING

Beware of the bomb blast that would kill you instantly! Bombs kill your enemies but also destroy some walls. By disappearing, they sometimes let appear bonuses:

	+1 bomb at a time		Blast power +1
	+3 bombs at a time		Blast power +3
	+1 speed units		Extra life
	+3 speed units		Freeze enemies
	Temporary Invulnerability		5 manually triggered bombs
	Bonus points only		

By collecting 5 speed units, you double the player speed. If you collect manually triggered bombs, wait for the best moment to trigger them by pressing the FIRE 2 button or the 'ENTER' key. The loss of a life also results in the loss of the abilities acquired during the game.

Some monsters must be hit several times to be destroyed. Do not hesitate to place bombs next to each other to extend the blast zone.

When all monsters have been destroyed, you are automatically teleported to the next level but if you lose all your lives, the game is over.

At the bottom of the screen you can see the number of lives remaining for each player (black indicator for Bart/Player1 and red for Bob/Player2, up to 15 lives), but also the number of bombs that the player can lay at the same time (black indicator, up to 8 bombs simultaneously) and the power level of the bombs (orange indicator, from 1 to 9).
